Field Codex · enemies, towers and upgrade paths

Game v3.6.0 · 20 towers · 34 enemies · generated 2026-10-21 from the game's own data

How to read this codex

Towers and upgrades

- **Stock:** every tower is built as its stock model. Its **Retrofit** is a choice of three (`Y` , then `1` - `3`); once fitted it can't be changed.
- **Three paths (A, B, C)** are open from the start, each four steps and a **mastery**. `U` , `I` and `O` buy the next step on A, B and C.
- **Primary and secondary:** the first path to reach step 3 becomes the primary and can go on to its mastery; a second path stops at step 2, and the third locks. The CAS Gunship is the exception: every path goes all the way.
- **Masteries** need that tower's Mastery research in the Research Lab.
- Each path's two icons show it at step 4 and at its mastery. Stat columns: the stock row lists the full stats, every other row what that step changes.
- **Costs** are base prices in credits; harder modes multiply every build and upgrade price (table on the right).

Enemies

- **Roles and tiers:** each enemy has a role (the job it does) and, within its role, a tier from T1 to T4; higher tiers are tougher versions. Specials are one-of-a-kind tricks.
- **Strength** (speed^2 × armor × health) sets the Strongest targeting order, every boss above the rest, and the **leak cost**: below 50 strength 1 shield, below 150 2, below 400 3, else 4. A boss costs the round it was introduced.
- **Elites** from round 10 carry modifiers (one, two from round 40, three from round 80), pay double and cost a shield more.

Difficulty modes

Mode	Rounds	Shields	Tower prices	Medal RP
Easy	40	200	×1.0	1
Medium	60	100	×1.0	2
Hard	80	50	×1.1	3
Nightmare	100	25	×1.5	4
Cataclysm	120	1	×2.0	5

Every run starts with 500 credits. Clearing a mode's last round earns the sector's medal for that mode, and endless mode begins straight away.

Enemy scaling

- **Health** grows every round: ×2.38 at round 20, ×4.78 at 40, ×8.13 at 60, ×15.18 at 80, ×26.37 at 100 and ×43.5 at 120. Each enemy card lists its health at sample rounds.
- **Credits per kill** grow with health: base × (round health multiplier)^0.3.
- **Armor** removes that much damage from every hit. Barriers absorb damage before the hull and ignore armor.
- Every round is the same on every playthrough, sector and mode; a new enemy leads every other round.

Elite modifiers

Modifier	From round	What it does
Shielded	10	A barrier worth half its health that recharges when left alone. Counter: Tesla arcs and Shockwave pulses break barriers fast.
Hasty	12	Moves 35% faster (and ranks higher for it). Counter: slows.
Regenerating	14	Repairs 3% of its health per second after 2 s without damage. Counter: steady damage, burns and acid.
Plated	16	4 more armor (and ranks higher for it). Counter: armor-piercing hits, armor shred and beams.
Cloaked	18	Cloaked: towers can't target it unless a Radar ping or area damage reveals it. Counter: Radar Towers and area damage.
Splitting	22	Breaks into two of its role's tier below when destroyed (two Skitters from a T1 or a Special). Counter: area damage.
Jamming	24	An EMP every 6 s knocks towers within 80 px offline for 1.5 s. Counter: long range.
Resolute	28	Resists half of every slow and can't be stunned. No counter: bring more damage.
Commanding	32	Other non-boss enemies within 90 px move 15% faster. Counter: kill it first (the Support priority doesn't pick it unless it is a Support).

Regular enemies

Drone

Swarm T3 · strength 21 · Ground · first seen round 1

Basic combat drone.

Strike Drone

Rusher T3 · strength 67 · Flyer · first seen round 25

Quad-rotor strike drone. Flies straight at the core, ignoring the lane. Mortars can't hit it.

Health	100	Speed	82 px/s	Armor	0
Credits	5	Leak cost	2 shields	Size	9 px

- Flies straight at the core on the air lane. Only towers that hit air can hit it.

Titan

Tank T4 · strength 567 · Ground · first seen round 57

Walking fortress with 9 armor and half resistance to slows. At half health its plates shed: armor drops to 5, but it speeds up 20%. Bring armor shredders and big hitters.

Health	700	Speed	30 px/s	Armor	9
Credits	24	Leak cost	4 shields	Size	18 px

- Below 50% health its plates come away: its armor drops to 5 and it speeds up x1.2.
- Resists 50% of every slow.

Capacitor

Disruptor T4 · strength 325 · Ground · first seen round 55

Charges for 2 s, then blacks out every tower within 160 px for 3 s, every 8 s. Stun or silence it during the charge (or hit it with Overload Circuits) to cancel the pulse.

Gun Turret

Assault · 75 cr · air and ground

A basic rotating machine gun turret. "It's a machine gun, Private!"

Stock	**Gun Turret**	75	`DMG 16 · RNG 130 · 1.20/s`	75 credits; 16 damage, 130 range, 1.2 shots/s (about 19 damage per second, close to the Pulse Turret's 18, in fewer, harder hits). Air and ground.
Retrofit	**Water-Cooled Barrel**	40	`Attacks/s 1.20 → 1.50`	Fire rate 1.2 to 1.5/s.
Retrofit	**Shock Rounds**	5	`Stun chance 5% · Stun time 0.3s`	Every hit has a 5% chance to stun its target for 0.3 s.
Retrofit	**Incendiary Rounds**	25	`Ignite dps 3`	Hits set the target burning for 3 damage per second for 2 s. Proposed: a new hit refreshes the burn rather than stacking it, so it adds 3 damage per second to the current target.

Key `O` · whole path 4,470 cr · as a secondary (2 steps) 180 cr

C T1	**Swivel Mount**	15	`Instant retarget, no overkill`	Switches to a new target instantly after a kill, and doesn't fire at enemies already about to die (no wasted rounds on swarms and holograms)
C T2	**Side Gun**	165	`Side gun damage 50%`	A small side gun fires at a second target at 50% damage
C T3	**Twin Mount**	330	`Targets/volley 2`	2 targets at full damage
C T4	**Belt Feed**	660	`Attacks/s 1.20 → 1.50`	+0.3 shots/s on every barrel
C Mastery	**Triple Mount**	3,300	`Targets/volley 2 → 3 · Extra barrels hit the weakest`	3 targets; the extra barrels go for the weakest enemies in range (swarms, holograms)

Mortar Tower

Assault · 150 cr · ground only

Lobs high-explosive shells at nearby enemies. "Toob."

Stock	**Mortar Tower**	150	`DMG 30 · RNG 110 · 0.60/s · blast 60`	150 credits; 30 damage per shell, a 60 px blast, 110 range, 0.6 shells/s; ground only. Its value matches the Gun Turret's credits per point: the Mortar does a little less single-target damage but hits a whole pack.
Retrofit	**Field Kit**	120	`Damage 30 → 34 · Range 110 → 120 · Attacks/s 0.60 → 0.65 · Blast radius 60 → 65`	A reinforced baseplate (+4 damage), a ranging sight (+10 range) and an ammo rack (+0.05 shells/s, +5 px blast).
Retrofit	**Bunker Sight**	15	`Burrowed damage 50%`	It can target burrowed enemies inside Radar Tower range, at half damage (the Bunker Buster mastery does it at full).
Retrofit	**Smoke Shells**	15	`Smoke slow 15%`	Every 4th shell leaves a smoke cloud for 3 s that slows enemies inside it by 15%.

Rocket Salvo

Assault · 200 cr · air and ground

Launches a volley of rockets at oncoming enemies. "Instead of shooting bullets, it shoots very angry telephone poles that hate absolutely everything."

Stock	**Rocket Salvo**	200	`DMG 19 · RNG 180 · 0.40/s · missiles 3 · blast 25`	200 credits; a salvo of 3 rockets every 2.5 s, each on a different enemy, 19 damage with a 25 px blast; 180 range; air and ground. Without homing, rockets fly at where the target was, so very fast or blinking enemies can dodge them.
Retrofit	**Proximity Fuses**	40	`Flyer damage x1`	Rockets burst beside flyers for +40% damage against air. Replaces Guidance Fins, which partly overlapped Range step 2's homing.
Retrofit	**Smoke Trails**	20	`Smoke slow 10%`	Rockets leave smoke along their path that slows enemies inside it by 10% for 2 s. Replaces the Autoloader, which duplicated the Payload path's reloads (Quick Loader, Auto-Loader).
Retrofit	**Incendiary Warheads**	125	`No stat changes: see the description.`	Blasts leave burning ground, 3 damage per second for 2 s. Replaces the Long Booster, which duplicated Range step 1 (Booster Stage).

C Mastery	**Quad Mount**	3,460	`Attacks/s 5.20 → 7.00 · Barrels 2 → 4`	7 rounds/s from four barrels: a wall of fire

Artillery Cannon

Assault · 300 cr · ground only

A large-bore cannon that fires high-explosive shells very long distances. "It's not DiGiorno..."

Stock	**Artillery Cannon**	300	`DMG 75 · whole map · 0.25/s · blast 70 · burn 15`	300 credits; a heavy shell every 4 s onto the aimed spot, 75 damage, a 70 px blast, 1.5 s flight time; ground only. A new cannon aims at the track point nearest to itself until you set it.
Retrofit	**Shell Magazine**	120	`Heavy shell every 3`	Every third shell is a heavy round for +50% damage (about +17% on average), with no change to reload time.
Retrofit	**Stabilised Mount**	120	`Scatter 30 → 15`	Shells land within 15 px of the aimed spot instead of scattering up to 30 px, so the blast hits what you aimed at.

Radar Tower

Utility · 575 cr · air and ground

Radar is able to detect and alert nearby towers of stealthy or otherwise hidden enemies. "I've lost the bleeps, I've lost the sweeps, and I've lost the creeps."

Stock	**Radar Tower**	575	`RNG 160 · ping_every 3.0s · reveal_time 1.0s`	575 credits; a 160 px radius. Every 3 s it pings: for 1 s, cloaked enemies inside are targetable, and burrowed enemies show, so towers that can hit underground (the Mortar's Bunker Buster, the Mine Layer) can target them. Only towers within the radar's 160 px benefit. Doesn't attack.

Tractor Tower

Defense · 575 cr · air and ground

A dish-mounted emitter that locks a tractor beam onto a single enemy and hauls it back down the track before letting go. "You're my friend now."

Stock	**Tractor Tower**	575	`RNG 160 · pull 80 · hold 1.5s · pull 80 · recharge 6.0s`	575 credits; 160 px range; air and ground. It locks one enemy (by its targeting mode), holds it for 1.5 s while hauling it 80 px back along the track, releases it, then recharges for 6 s. While held, the enemy can't move forward, blink or use abilities (a hold counts as a stun for those rules). The pull scales by role weight, as on the Magneto (Swarm full, Tank half, Boss a quarter).
Retrofit	**Beam Sweep**	175	`Beam slows others 30%`	While holding, the beam slows every other enemy it crosses by 30%. It replaced Twin Emitter (a second beam at half the pull, 575), by the owner's choice of three ideas on 2026-10-19. Price (proposed): the formula's step-1 price for about a 15% gain on the stock effect (a 30% slow on the enemies crossing the beam during each 1.5 s hold); the balance probe checks it.
Retrofit	**Longer Hold**	140	`Holds for 1.5s → 2.0s`	Holds for 2 s.
